

IRM
Energy Special Interest Group

April 2010

Introduction

- Several members of the IRM have expressed an interest in forming an Energy Special Interest Group (SIG)
- A Steering Group has now been formed.
- To take the SIG forward, we need to know *who* wants to be involved and *what* they expect from the SIG

Progress to Date

- An informal meeting was held during the September 2009 Forum
- An teleconference was held on 9th February 2010 which agreed the **objectives** and resulted in the formation of a **Steering Group**
- The Steering Group met on 18th March and drew up a provisional list of areas to be covered and the first two formal meetings
- ***Before we go further, we need to understand who is still interested and whether what we are proposing meets your needs***

Steering Group

- **Chair:** David Stephens
david.stephens@arevarmc.com
- **Secretary:** Richard Tabberer
Richard.tabberer@eon-uk.com
- Myles Dytor, Jonathan Hess and Tony Prior

Proposed Objectives

The teleconference of February 9th agreed the following:

- broaden members' understanding by sharing knowledge and experience;
- support the IRM by recruitment, student support, conferences, magazine, etc.;
- develop and share good practice in risk management relevant to energy sectors;
- help members network with each other and with other energy or risk professionals;
- provide opportunities to identify risks, trends and issues.

Why Have a SIG for Energy?

The SG believes that the risk areas of particular interest to the energy industry are:

- Political and regulatory risk
 - Including environmental and political activism
- Security of Supply
- Long-term Investments

Do you agree with this list?

Are there other areas you would add?

Next Steps

We are planning the following meetings

- June : Security of Supply
- September: Asset Valuation and Insurance

Are you interested in attending either or both of these?
