

## Industry Workshop Exploring the link between complexity and risk

Thursday 31 January 2019, 2.30pm – 5.30pm  
IRM Training Room, 2<sup>nd</sup> Floor, Sackville House, 143-149 Fenchurch Street,  
London EC3N 6BN

IRM's 2014 Extended Enterprise guidance identified the importance of understanding the complex and interdependent networks behind the delivery of many products and services. This workshop aims to take forward the discussion about managing risk under conditions of complexity which challenges traditional risk mitigation techniques and organisational processes (e.g. risk frameworks). We are aiming to share viewpoints from different sectors on ways of tackling complexity and allow participants to explore future collaboration opportunities.
